| | | | | Campus-wide ITS Project prioritization, project sizing, implementation supporting alignment with Client-driven academic and business | | Technology | | | In FY 09-10, ITS worked with the Administrative Systems Committee (ASC) to implement a project prioritization process in which an allotment of project resource hours is made available for ASC highest priority and divisional priority work at the beginning of the fiscal year. Resource hours are allocated to projects by skillset and tracked across the year. In FY 09-10, hours from appropriate ITS resources were made available for more than 50 ASC/divisional project priorities. ITS also committed significant time to development of the TimeTrack project reporting system to enhance visibility of project effort and status. Additional details | ITS project prioritization in conjunction with the ASC is an ongoing process. Further refinement of the process will occur in FY 10-11. TimeTrack development will continue in response to client |

| ITS | Collaboration Sustainability | | n/a | Continued support of email outsourcing pilot (iSpartan email for faculty/staff), with possible launch of campuswide migration | | Technology | Institutional Priority | In process | Following the successful August 2008 launch of iSpartan (Google) student email and a successful FY 08-09 staff email pilot within ITS, a decision was made in Fall 2009 to proceed with a campus-wide optin for faculty/staff interested in migrating to iSpartan email (UNCG's Gmail implementation). As of late June 2010, 1,215 faculty and staff have moved to iSpartan. ITS also completed implementation of the Postini email archiving solution and developed solutions | Faculty/staff migrations will continue through FY 10-11, with a goal of moving all faculty and staff to iSpartan |
